The huge astronomical clock  
of the Strassburg Cathedral  
was rebuilt

A perpetual calendar forming a  
ring around a dial 30 feet in  
circumference occupies the central  
part of the lower division of the  
clock. At midnight, Dec. 31<sup>st</sup>  
the clock regulates itself for the New Year.

for 365 or 366 days as the Case may be - even  
the omission of the leap day every 400 yrs being  
provided for. The disc within the calendar  
shows the eclipses of the sun and moon  
calculated for all time to come. An owl  
with Apollo points with an arrow to the date  
and name of the saint for the day. Above  
the calendar is a niche in which on each day,  
the mythologized deity of the day appears. - Apollo  
on Sun, Diana on Mon; Mars on Tue; Mercury on Wed;  
Jupiter on Thur; Venus on Fri; & Saturn on Sat.

There is an ever showing revolution of the 7  
visible planets around the sun, 12 apostles  
pass the image of Saviour - and more. Wondrous  
& divine.
